

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country excursion in their RV. Newly retired, after spending many years working with his brother to assemble their crane company into an market leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

While on their trip, John spent time conversing with past business associates whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John discovered an infinite marketplace for a product that could promptly and securely elevate individuals in the air to accomplish maintenance and other construction services.

Following their return from vacation, John set up a business with two of his friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design essentials of that original lift into current designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has extended itself into quite a few global markets and continues to develop innovative machinery to ensure that customers are able to become safer and more resourceful within their workplace.
