

## Clark Forklift Part

Clark Forklift Part - At present, there are no less than 350,000 Clark lift trucks performing worldwide, and more than 250,000 operating in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 specialized parts fabricated for 20 exclusive brands of lift trucks and automated equipment. Your regional Clark Seller is your total source for availability of all your components requirements supplied by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their clients and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to offer the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Worldwide, Clark has one of the most impressive supplier support networks. With over 550 locations globally, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the material handling industry.

Clark proudly remains an progressive leader of the industrial equipment industry, pioneering safety features such as the operator restraint system. This exceptional dedication to safety is at this time a standard feature on every forklift.

Clark's relentless mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift maker across the world to be certified with the internationally approved quality standard ISO 9001 for all of their manufacturing facilities. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any environmental restrictions, thus placing them in a prevailing market position.

Clark has selected the system of "Lean Manufacturing" at all of its assembly facilities because this technique is extremely economical and enables minimal use of resources. Developed to guarantee maximum proficiency, this system is intended to discover and acknowledge the most efficient ways for manufacturing plant management. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

By working in concert, Clark's product suppliers and engineers communicate towards improving product effectiveness while minimizing expenses. The new value engineering agenda combines progressive product improvement and offers superior customer support and service within the industry.
